EXP 8 :

Requirement Prioritization of an Online Learning Platform Using MoSCoW and Kano Techniques in Jira

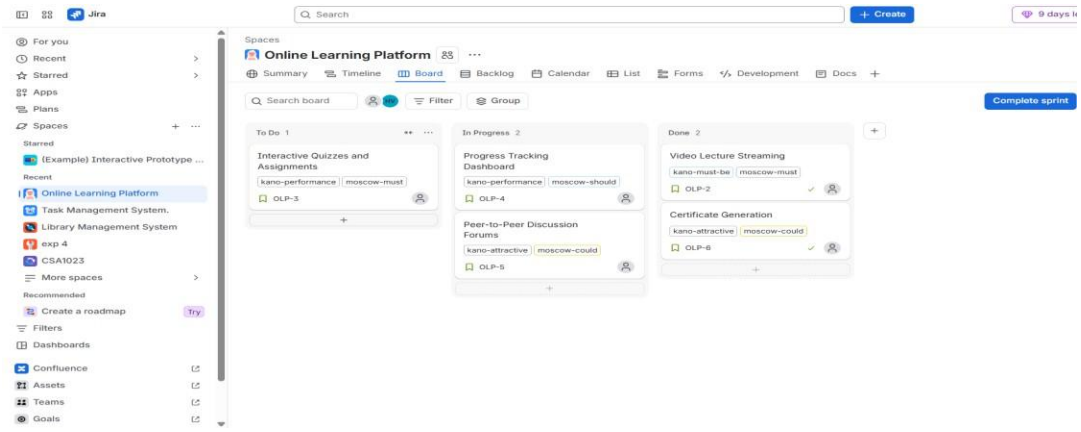

Aim:

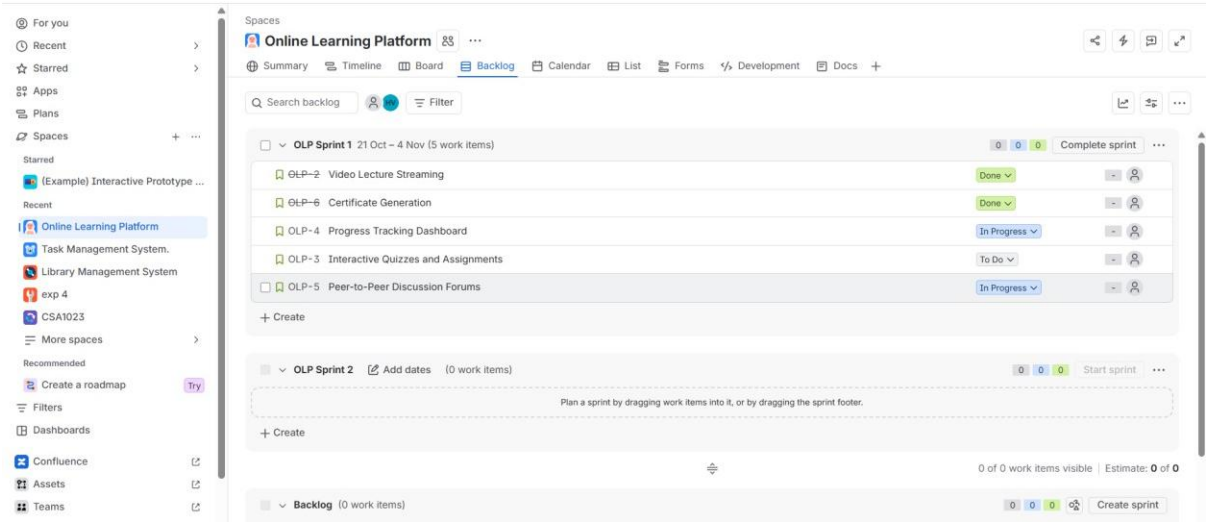

To categorize and prioritize the requirements of an Online Learning Platform using MoSCoW and Kano techniques in Jira, based on their implementation priority and impact on user satisfaction.

procedure:

1. Open Jira and create a project named Online Learning Platform.
2. dd the following requirements: Course Enrollment and Registration, Video Lecture Streaming, Interactive Quizzes and Assignments, Progress Tracking Dashboard, Peer-to-Peer Discussion Forums, and Certificate Generation.
3. Categorize each requirement using the MoSCoW technique as Must Have, Should Have, or Could Have.
4. Add the corresponding MoSCoW labels to each requirement in Jira.
5. Classify each requirement using the Kano model as Must-be, Performance, or Attractive.
6. Add the corresponding Kano labels to each requirement.
7. Verify that all six requirements have both MoSCoW and Kano labels.

Outputs:

Result: The six requirements of the Online Learning Platform were successfully created in Jira and categorized using the MoSCoW and Kano techniques based on their implementation priority and expected impact on user satisfaction.
