EXP 7:

Task Management System Feature Prioritization

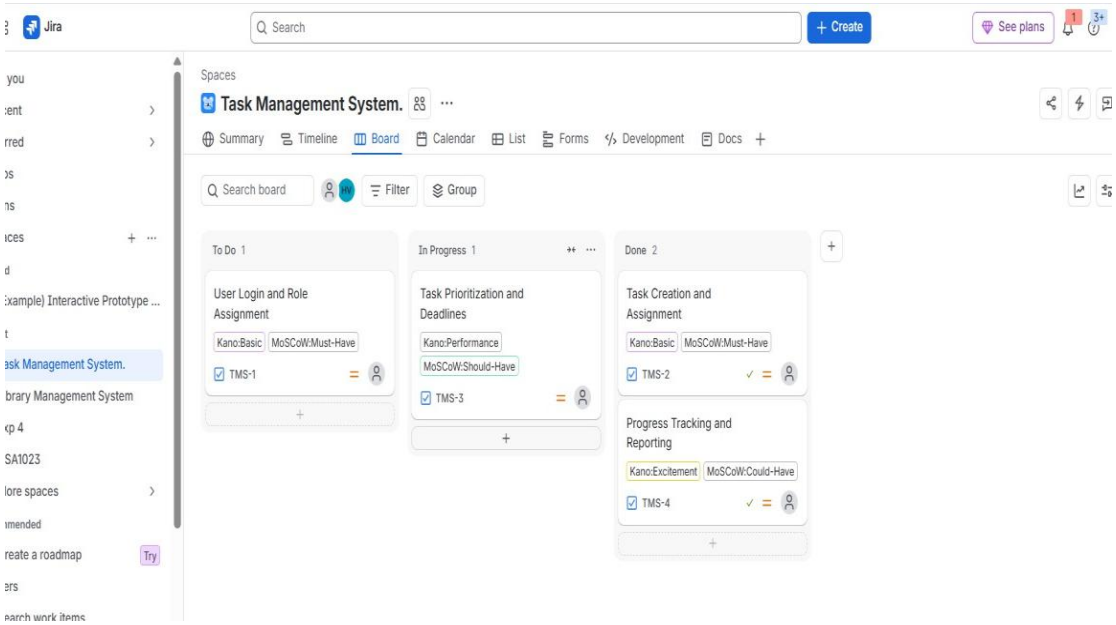

Aim:

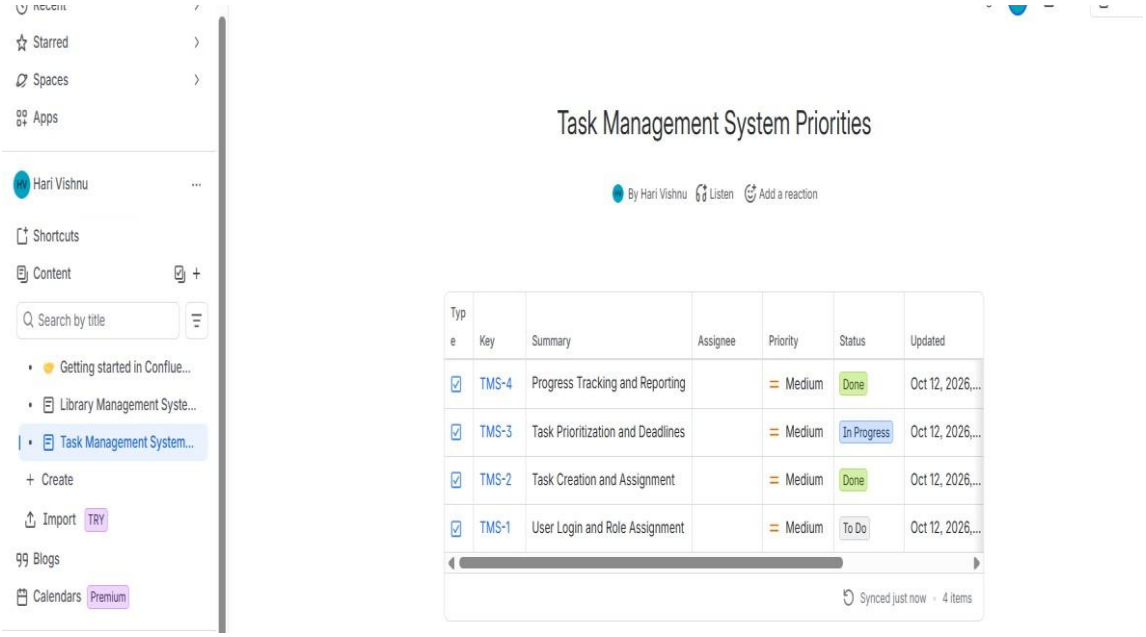

To design a Task Management System and prioritize its core features using the MoSCoW and Kano models in Jira, and report the categorized findings in Confluence.

procedure:

- Create a Kanban team-managed project in Jira named "Task Management System".
- Create four tasks representing the core system features: User Login and Role Assignment, Task Creation and Assignment, Task Prioritization and Deadlines, and Progress Tracking and Reporting.
- Open each task and apply the appropriate MoSCoW (e.g., MoSCoW:Must-Have) and Kano (e.g., Kano:Basic) tags using the 'Labels' field.
- Create a new page in Confluence titled "Task Management System Priorities".
- Use the /jira macro to embed the project tasks, configuring the display columns to ensure the 'Labels' column is visible.
- Publish the Confluence page and capture the final screenshot.

Outputs:

Result: Thus, The Scrum sprint executed successfully and sprint board tracked progress.
